

Streak tests (manual)

Test the value for 'streak', given if a player guesses all words correct, or gets words wrong in certain rounds, restarting streak

Test number	Test Case	Status	Expected Result	Actual Result	Explanation			
1	All 10 round words succeed	Passed	Streak = 10	Streak = 10	Streak should keep building up due to no failed guesses			
2	Round 5 fail to guess	Passed	Streak = 5	Streak = 5	Streak should go to 0 round 5, so only has 5 rounds left to build up			
3	Round 3 and 8 fail to guess	Passed	Streak = 2	Streak = 2	Streak should go to 0 round 8, so only has 2 rounds left to build up
